Heart disease is a leading cause of death in the United States, costing about $213.8 billion each year in health care services, medications and lost productivity.

National Numbers

Heart disease is a leading cause of death in the United States, costing about $213.8 billion each year in health care services, medications and lost productivity.

42 SECONDS
How often someone has a heart attack.

60 SECONDS
How often someone dies from a heart disease-related event.

841,000
Number of Americans that die from heart disease each year. That’s 1 in every 3 deaths!

Palomar Health Numbers

As a Center of Excellence at Palomar Medical Center Escondido, our award-winning Palomar Health Heart & Vascular Center delivers optimal patient care in emergencies and state-of-the-art comprehensive cardiac care. Through a collaborative effort between physicians and our interdisciplinary health care team, we provide coordinated services across the continuum of care, which include STEMI treatment, TAVR procedures, minimally-invasive open heart valve surgery and cardiac rehab with 24/7 lifesaving services.

EMERGENCY CARE STATS

24/7
Cardiac Surgeon available 24/7

60 MINUTES
Average door-to-balloon time (national recommendation <90 minutes)

99%
Patients who received Cardiac Catheterization or emergency STEMI treatment <90 minutes from incident

CONTINUUM OF CARE STATS

ZERO
Number of sternal infections over the past 3 years

553
Total percutaneous interventions (PCIs)

140
Number of open heart surgeries performed by the Cardiac Surgeon who is available 24/7

OVER 93%
“Off pump” procedures performed to improve recovery time and decrease patient risk for Coronary Artery Bypass Graft (CABG)

Patient Satisfaction

99% Patient Satisfaction Rate in these areas for all Coronary Artery Bypass Surgeries
