Nurses, therapists and case managers are invited to join the Palomar Health 7th Annual Orthopedic & Spine Virtual Symposium: Webinar Series
Although we cannot come together, you can still join our Palomar Health experts for a virtual webinar series focused on orthopedic and spine education. Although this year hasn’t looked quite like we expected, our future is still bright and we’re excited for what we see ahead. We’ll discuss new technologies and what a “new normal” may look like while balancing COVID-19 regulations. This series is designed to assist the community of orthopedic and spine care clinicians with innovative ideas and understanding the advanced treatments to get patients back to moving and back to the lives they love.

1 CEU has been approved by the following organizations for each course attended
BRN Board of Registered Nursing
Physical Therapy Board of California
Occupational Therapy of California
ONCB Category A

SCHEDULE OF PRESENTERS

SEPTEMBER 30
Andrew Nguyen, MD
Neurosurgeon
Robotic Spine Surgery: Intraoperative Perspectives
Learn about the latest robotic technologies in spine surgery and the benefits of this advanced treatment for back pain.
